

- A hands-on workshop for your marketing team

Getting Started with AI: Building Copilot Agents

Get your marketing team building with AI — using Microsoft 365 Copilot day to day and building their own agents — and confident to keep going on their own.

FOR

Marketing —
design, copy &
ops

DATE

Wednesday 18
March 2026

FORMAT

Hands-on, in your
own M365

DURATION

Half-day, ~3.5 hrs
(incl. break)

WHAT YOU'LL LEAVE ABLE TO DO

- Know when to use Microsoft 365 Copilot day to day and when to build a purpose-built agent — and why.
- Use Microsoft 365 Copilot to complete a real marketing task end to end across your apps.
- Build your own simple agent in Copilot, grounded in your brand guidelines and formatting rules.
- Write prompts that produce usable, on-brand copy — ready to publish or send with minimal editing.
- Keep building on your own afterwards, using the take-home pack.

BEFORE THE SESSION

- A Microsoft 365 Copilot licence, signed in. Check you can open Copilot in Word, Outlook and Teams.
- Your laptop, signed in, with access to Outlook, Word, Teams and SharePoint.
- One real marketing task you'd normally do by hand, plus your brand guidelines — tone of voice, colours, and who you're writing for.

AGENDA

09:30 – 09:45 Welcome & what today gives you

A quick round of the room and the goal: you leave able to use Copilot and build a simple agent yourself — not just watch a demo.

09:45 – 10:15 The landscape: Copilot and agents — when to use what

A plain-English map of both, with marketing examples of each:

- Microsoft 365 Copilot — your everyday assistant in Word, Outlook, Teams and PowerPoint: ask, draft, summarise and rewrite.
- A built agent (Copilot Studio) — a narrow, repeatable task you set up once and reuse, like a branded copy assistant.

10:15 – 11:00 Hands-on 1 — real work with Microsoft 365 Copilot

Take the real task you brought and do it with Copilot in your apps — for example, draft a campaign email in Outlook, repurpose a blog into social posts, or summarise a long brief.

- Give Copilot clear context and say exactly what you want.
- Work right where you already are — in Word, Outlook and Teams.
- Iterate on the result, and always review before you use it.

11:00 – 11:10 Break

11:10 – 12:10 Hands-on 2 — build your own agent in Copilot

Build a simple copy assistant agent in Copilot Studio and make it yours:

- Ground it in your brand guidelines — colours, tone (e.g. enthusiastic or more formal), and target audience.
- Give it clear formatting rules so the output comes back consistent and on-brand.
- Test it on a real piece of copy and refine until the output is usable straight away.

12:10 – 12:40 Making it stick: prompting, brand and keeping output usable

The techniques that separate a rough draft from something you can publish:

- Prompt patterns that work, and reusable templates for your common tasks.
- Feeding an agent your brand guidelines and formatting rules so you edit less.
- Reviewing, approvals, and keeping work data safe.

12:40 – 13:00 Your take-home pack & next steps

You leave with everything needed to keep going:

- A prompt template library and a one-page cheat sheet.
- A short how-to guide for building your own agents.
- A challenge: build one more agent this week — and where to get help if you're stuck.

How we run it: hands-on throughout — you'll work in your own Microsoft 365 on real tasks, not slides, and leave able to do it without us in the room.
